

## ELECTRICAL ENGINEERING SERVICES

**PROVECTA's** staff have been involved on a wide variety of projects requiring electrical systems and equipment design, procurement, installation and commissioning for industrial plants. We employ both qualified electrical engineers and draftsmen. Whilst not providing services in some highly specialised areas of heavy electrical engineering, **PROVECTA** staff have demonstrated experience in providing electrical engineering and project management services suitable for most industrial plant applications.

**PROVECTA** is able to offer the following electrical engineering services :

- Electrical systems design & investigations.
- Review of electrical equipment condition and suitability
- Equipment selection and procurement
- Cabling design
- Power systems design for control and computer equipment
- Electrical equipment integration into supervisory control systems (SCADA)
- Electrical drafting services
- Contract Management
- Cost Estimation & Management
- Implementation Strategies
- Project Scheduling
- Installation Management & Supervision
- Design and Test QMS Procedures
- Site Commissioning Managers

The use of **PROVECTA's** electrical engineering capability assures that you will receive independent professional services committed to quality electrical engineering with timely service.

Please contact Mr. Andrew Oates on the contact details below to discuss further where **PROVECTA** can add value to your next electrical engineering project.
